DESCRIPTION
The ultraminiature SRF300 and SRF303 relays are designed to provide a practical surface-mount solution with improved RF signal repeatability over the frequency range. These relays are engineered for use in RF attenuator, RF switch matrices, ATE and other applications that require dependable high frequency signal fidelity and performance.

The SRF300 and SRF303 feature:
- High repeatability
- Broader bandwidth
- Metal enclosure for EMI shielding
- High isolation between control and signal paths
- High resistance to ESD

The following unique construction features and manufacturing techniques provide excellent robustness to environmental extremes and overall high reliability:
- Uniframe motor design provides high magnetic efficiency and mechanical rigidity
- Minimum mass components and welded construction provide maximum resistance to shock and vibration
- Advanced cleaning techniques provide maximum assurance of internal cleanliness
- Hermetically sealed
- Soldier Dipped Leads, (RoHS compliant solder option available)

The Series SRF300D/SRF303D and SRF300DD/SRF303DD relays have internal discrete silicon diodes for coil suppression and polarity reversal protection. This hybrid package reduces required PC board floor space by reducing the number of external components needed to drive the relay.

ENVIRONMENTAL AND PHYSICAL SPECIFICATIONS
- Temperature (Ambient)
  - Storage: –65°C to +125°C
  - Operating: –55°C to +85°C
- Vibration (General Note I): 10 g's to 500 Hz
- Shock (General Note I): 30 g's, 6ms half sine
- Enclosure: Hermetically sealed
- Weight:
  - SRF300: 0.09 oz. (2.55g) max.
  - SRF303: 0.16 oz. (4.5g) max.

INTERNAL CONSTRUCTION

TYPICAL RF CHARACTERISTICS (See RF Notes)

RF NOTES
1. Test conditions: 
   a. Fixture: .031” copper clad, reinforced PTFE, RT/duroid® 6002 with SMA connectors. 
      (RT/duroid® is a registered trademark of Rogers Corporation.)
   b. RF ground shield is soldered to PCB RF ground plane.
   c. Room ambient temperature.
   d. Terminals not tested were terminated with 50-ohm load.
   e. Contact signal level: –10 dBm.
   f. No. of test samples: 2.
2. Data presented herein represents typical characteristics and is not intended for use as specification limits.
3. Data is per pole, except for pole-to-pole data.
4. Data is the average from readings taken on all open contacts.
5. Data is the average from readings taken on poles with coil energized and de-energized.
6. Data is the average from readings taken on all closed contacts.
7. Test fixture effect de-embedded from frequency and time response data.

Series SRF300/SRF303

DPDT Non-Latching Electromechanical Relay
Signal Integrity up to 18Gbps

SERIES SRF300/SRF303 OUTLINE DIMENSIONS

(Viewed From Terminals)

SCHEMATIC DIAGRAMS

SRF300/RF303

SRF300D/SRF303D

SRF300DD/SRF303DD

NOTES:
1. DIMENSIONS ARE IN INCHES, METRIC EQUIVALENTS SHOWN IN ( ).
2. POSITIONS 5 AND 10 ARE FOR UNINSULATED CASE GROUND OPTIONS.
3. NO PROTRUSION BELOW BOTTOM OF HEADER WHEN GROUND PINS ARE INSTALLED.
4. TO ORDER THE CASE GROUND OPTION, AFTER THE SERIES DESIGNATOR, ADD “Y” TO THE PART NUMBER FOR POSITION 5 OR “Z” TO THE PART NUMBER FOR POSITION 10.

Teledyne Part Numbering System for SRF300/SRF303 Relays

NOTES:
1. Standard Relay lead finish: Solder-Dipped Leads (Sn60/Pb40)
2. For RoHS Solder, add /R at end of part number. EX: SGRF303D-5/R
RoHS Solder: (Sn99.3/Cu0.7)
3. The slash and characters appearing after the slash are not marked on the relay.

GENERAL NOTES
I. Relays will exhibit no contact chatter in excess of 10 μsec or transfer in excess of 1 μsec.
II. For reference only. Coil resistance not directly measureable at relay terminals due to internal series diode.
